SUMMARY

Full-stack developer with 3 years of experience building websites and web apps with HTML, CSS, JavaScript, React and Python. I also build AI tools such as chatbots and WhatsApp agents. I work with clients directly, from the first request to the live launch, and I care about fast, clean sites that rank well on Google.

SKILLS

Frontend: HTML, CSS, JavaScript, React, responsive design, SEO basics

Backend and scripting: Python

AI and automation: OpenAI-compatible APIs (OpenAI, OpenRouter), chatbots, WhatsApp agents

Cloud and tools: Cloudflare Workers (KV, Durable Objects), Vercel, Netlify, Git and GitHub

EXPERIENCE

Freelance Full-Stack Developer Lahore, Pakistan | 3 years

- Built and launched websites and web apps for clients, handling the work from request to handover.
- Built SEO-focused business websites with sitemap and robots.txt so clients show up in local Google searches.
- Built AI-powered tools: a glassmorphism chatbot and a WhatsApp AI agent that replies to customers automatically.
- Deployed and maintained projects on Vercel, Netlify and Cloudflare Workers.

SELECTED PROJECTS

3D Developer Portfolio React, TypeScript, Three.js, GSAP

A portfolio site with a 3D character on desktop, scroll animations and light and dark themes. Mobile gets a lighter version with my photo to keep load time low.

JUTTXTECH0, WhatsApp AI Agent Cloudflare Workers, KV, OpenRouter

A WhatsApp agent that answers messages with AI, stores chat history in KV, and uses Durable Object alarms for fast polling.

Aura AI, Premium Chatbot HTML, CSS, JavaScript

A ChatGPT-style chatbot with a glassmorphism design, built as a single file and connected to OpenAI-compatible APIs.

Karachi Satellite Website HTML, CSS, JavaScript, SEO

A client website for a satellite and dish business in Lahore, built for local search with sitemap, robots.txt and clear service pages.
